Objective

Full Stack Developer specializing in Python backend and REST APIs, with experience in automation, third-party API integrations, and modern frontend development. Product-driven, remote-ready, and highly motivated to grow while building scalable automation-focused products at Zyngate.

Technical Skills

Front-End: Figma, Framer, HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive UI Development

Back-End: Node.js, Express.js, Python (Flask), RESTful API Design and Development

Databases: MongoDB, MySQL, PostgreSQL

Version Control & Tools: Git, GitHub, VS Code, Postman, Docker

Other: REST APIs, JWT Authentication, Copilot

Working Environment: Windows, Linux, Amazon web services, integration with AI

Projects

Habit Tracking Application – Full Stack Product

- Built a full-stack habit tracking product with end-to-end ownership, focusing on backend-first API design and a clean React-based UI. Designed and tested secure REST APIs for habit creation, updates, and tracking, with authentication and data validation. Backend tested with Postman.
- Features: API for task creation, status tracking, notifications, and filtering.
- Used personally for 25+ days, validating real-world usability and API reliability.
- **GitHub:** <https://github.com/Gauri-2044/Habit-Tracker>

NewsSphere – API-Driven News Aggregation Platform

- Developed an API-driven web application that aggregates real-time data from multiple third-party APIs. Implemented asynchronous data fetching, category filtering, search, and authentication to ensure fast, reliable content delivery.
- tech stack : HTML, CSS, JavaScript, REST APIs, Async Data Handling
- **GitHub:** <https://github.com/Gauri-2044/NewsSphere>

MOODMAP – Mental Health Chatbot – Full Stack Project with AI and ML

- Built an AI-powered chatbot that automates supportive conversations by analyzing user sentiment and emotional context. Designed backend APIs to process inputs, apply NLP models, and deliver contextual responses at scale.
- **Tech Stack:** Python, Flask, NLP, Sentiment Analysis.
- **GitHub:** <https://github.com/Amisha-1580/MentalHealthWebApp>

Network Topology Automation Tool – Cisco networking internship

- Developed a Python-based automation tool that converts router configuration files into optimized network topologies using best-practice logic. Owned backend workflows and automation scripts to simulate agent-like decision-making.
- Successfully integrated multiple live APIs, demonstrating reliable data synchronization and external API handling.
- **GitHub:** <https://github.com/Gauri-2044/Network-topology-builder>

Experience

Contributed in Developing and managing college Group website

June 2024

- Developed and maintained front-end components using React.js for client projects.
- Implemented RESTful APIs and back-end services in Node.js.
- Optimized website performance and ensured cross-browser compatibility.
- Collaborated with a 5-member team using Agile methodology and Git.

Education

sant Gadge Baba Amravati University – B.Tech in Computer Science and Engineering
CGPA: 9.3/10

2023 – 2027

Certifications

- Javascript essentials - Cisco networking academy

Achievements & Activities

- Participated in **DataDriven Vision** Hackathon – Developed a real-time salon appointment and payment platform integrating all salons of local area at one place.
- Contributed to open-source projects on GitHub.
- Active member of University Coding Club, mentoring juniors on full-stack development with usage of Artificial Intelligence.
